

A close-up photograph of the U-CARA Wall Mount system. It shows several rows of grey concrete blocks with a textured surface. Each block is secured to a dark metal rail that is embedded in a larger, lighter-colored concrete wall. The blocks are stacked in a staggered pattern, and the metal rails are visible between the rows.

# U-Cara Wall Mount System

The U-Cara Wall Mount System is an adaptation to the revolutionary U-Cara wall system that allows fascia panels to be mounted directly to substrate materials such as plywood or concrete.

## COMPONENTS

### 1 ALIGNMENT BAR

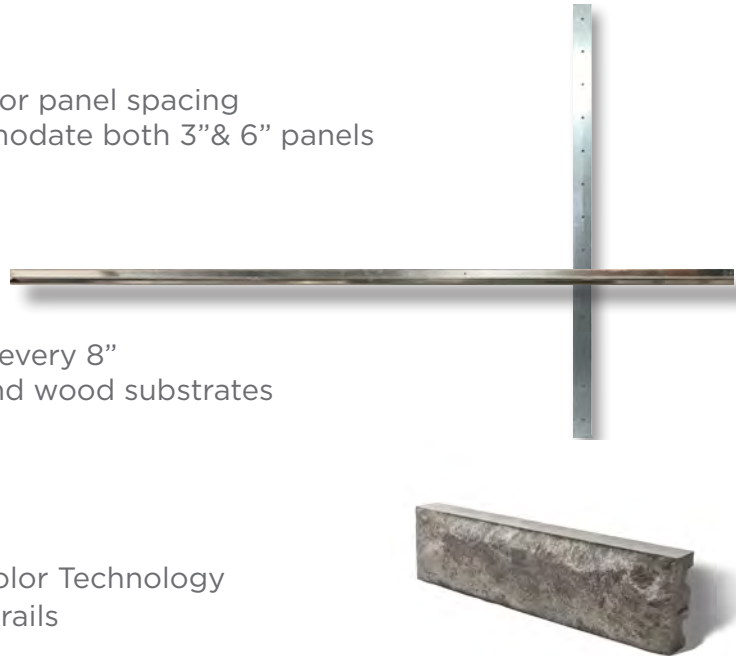

- 38 5/8" tall
- Eliminates the need to measure for panel spacing
- Pre-Punched every 3" to accommodate both 3" & 6" panels
- Installed 32" apart
- 10 per bundle

### 2 U-CARA MOUNT RAIL

- 8ft long with pre-punched holes every 8"
- Can be used on both concrete and wood substrates
- 10 per bundle

### 3 U-CARA FASCIA PANEL

- Only wall available with Enduracolor Technology
- Apply adhesive and hang on the rails
